Mincheol Kang

MS Student
ACSS Lab., KAIST EE
mintcat@kaist.ac.kr & presidentmc9898@gmail.com
https://mintcat98.github.io/

EDUCATION

Mar. 2026 ~ Present	**Korea Advanced Institute of Science and Technology** School of Electrical Engineering *Advisor: Soojean Han* *Master Student*	Daejeon, Korea
Feb. 2021 ~ Feb. 2026	**Daegu Gyeongbuk Institute of Science and Technology** School of Undergraduate Studies Thesis: CoDeMP: Color Description Multimodal Pipeline *Advisor: Yeseong Kim* *B.S. in Computer Science and Engineering* GPA: 3.99 / 4.3 *Cum Laude*	Daegu, Korea

RESEARCH INTERESTS

- Physical AI
- VLAs
- World Models
- Safe Control
- Reinforcement Learning

PUBLICATIONS

- *Sihyeong Lee, ***Mincheol Kang**, and †Daehee Park, "GOM: Guided Occupancy World Model for Robust Planning in Safety-Critical Scenarios" (Submitted to ECCV26)
- ***Mincheol Kang**, *Hyeonjin Lim, Bomin Kang, and †Daehee Park, "BitTP: The Lightweight Trajectory Prediction Model with BitLLM" (CVPR26 Findings)
- Yeonsun Yang, Ahyeon Shin, **Mincheol Kang**, Jiheon Kang, Xu Wang, and Jean Song , "Easy Come, Easy Go? Exploring Perceptions and Effects of LLM-Based Search-as-Learning Across Students and Educators" (Submitted to CHI26)

RESEARCH/WORK EXPERIENCES

- Research Student at KAIST EE, Autonomous Control and Stochastic Systems (ACSS) Research

Lab (Prof. Soojean Han), Korea (Mar. 2026 ~ Present) / Project Manager & Core Contributor, Brainpool Project (NRF)

- Research Student at DGIST EECS, Intelligent Systems and Learning (ISL) Lab (Prof. Daehee Park), Korea (Jun. 2025 ~ Jan. 2026) / Writing two CVPR26 papers as a main author
- Research Student at DGIST EECS, Privacy and Applied Cryptography (PAC) Lab. (Prof. Youngsik Kim), Korea (Feb. 2025 ~ Jun. 2025) / Learned foundational theories of cybersecurity
- Intern at Backend Team, Lablup Inc., Korea (Dec. 2024 ~ Feb. 2025) / Contributed to the Open Source Project named Backend.AI
- Research Student at DGIST EECS, Designing Intelligence Augmentation Group (DIAG) (Prof. Jean Song), Korea (Feb. 2024 ~ Sep. 2024) / Co-author of CHI25 paper

AWARDS AND HONORS

- 2026 Master's Excellence Scholarship (Science and Technology), Ministry of Science and ICT (MSIT), Korea (Aug. 2026)
- 2026 Hyundai Motor Chung Mong-Koo Scholarship (Science and Technology, Graduate Division), Hyundai Motor Chung Mong-Koo Foundation, Korea (Jul. 2026)
- IPESK Next-Generation Engineering Talent 2nd Cohort, Institute for Promotion of Engineering and Science of Korea (IPESK), Korea (Sep. 2025)
- Presidential Science Scholarship 22nd Cohort, Korea Student Aid Foundation (KOSAF), Korea (Jul. 2024)
- Scholarship Recipient, Dongil Culture Scholarship Foundation, Korea (Feb. 2024)

PROJECTS

- Code Refactoring: VFolder APIs in storage-proxy in Backend.AI, Lablup Inc., Korea / Modularizing volume and VFolder operations, applying Pydantic validation, improving API logging, and (Jan. 2025 ~ Feb. 2025)
- CoDeMP: Color Description Multimodal Pipeline, UGRP @ DGIST, Korea / Team-leader, Instance Segmentation, Code Integration (Feb. 2024 ~ Dec. 2024)

SKILLS AND TECHNIQUES

- **Programming Language**: Python, C++, MySQL
- **Frameworks**: PyTorch, Django
- **Specializations**:
  - Agile Project Managing with Git/GitHub and Notion
  - Video/Image Editting with Figma and Adobe Programs
- **English**: TOEIC 915
